PROFESSIONAL EXPERIENCE

2006 - Present **Americana Safety Associates, LLC – Ft. Lauderdale, Florida**

Senior Forensic Safety & Engineering Consultant

- Provides expert witness services to plaintiff and defense attorneys, as a contract consultant in personal injury, negligence and wrongful-death law cases. Areas of specialization include, but are not limited to, occupational safety and health, public safety, human factors, risk management, mine safety and health, environmental and industrial hygiene.
- Provides on-site occupational safety and health consultation services to various businesses and industries, including retail and manufacturing industries. On-site inspection services are provided to measure and ensure compliance with all applicable safety and health laws, regulations, codes and international conventions.

2002 - Present

Private Practice – Tampa, Florida

Forensic Safety & Engineering Consultant

Provided safety consulting services to clients

- OSHA compliance and regulatory actions, prevention programs, conformance auditing, performance assessment and incident investigation.
- Chairing National Standards committees, preparing professional articles and making professional presentations.
- Acting as topical expert in legal cases involving lockout/tagout and confined spaces.

1999 - 2001

ID Group, Inc. – Montreal/Quebec, Canada

Vice President Consulting Services

Responsible for directing safety and health consulting services for a broad range of Fortune 500 manufacturing clients. Key management executive involved with all facets of the business operation.

- Provided technical guidance for development of current generation of proprietary hazardous energy control software.
- Led marketing and sales effort to acquire several hi-profile accounts in targeted business sectors.
- Provide primary consulting services promotional support through public speaking, writing and national volunteer activities.
- Developed model for cost-benefit assessment of hazardous energy control services.

1987 - 1998

American National Can – Chicago, Illinois

Vice President, Environment, Health, & Safety (1994-1998)

Responsible for managing all domestic and overseas activities associated with the protection of human and physical assets, the environment and public for a \$5 billion diversified packaging company. Scope of influence included six major business units, 18,000 employees and 15 facilities in 30 states and 12 countries.

- Guided efforts to integrate environment, health and safety initiatives as well as establish ISO 9000/14000 compatible management systems.
- Directed EPA/OSHA regulatory affairs involving over 150 site inspections with minimal non-compliance impact.
- Managed development of EHS manuals, centralized *Title V* permit process, and compliance audit mechanisms.
- Led EHS due diligence process for sale of two major businesses valued at \$1.2B.
- Developed occupational health risk assessment process for intervention targeting strategy.

1987 - 1998

American National Can – Chicago, Illinois

Director, Safety & Health (1987-1993)

Directed company occupational health, industrial hygiene, property protection, and safety programs. Responsible for policy-procedure development and assisting management to implement progressive protective practices.

- Collaborated with operational management to achieve 40% reduction in injury/illness rates. Achieved experience less than one-half of U. S. manufacturing rates.
- Developed state-of-the-art hearing conservation and chemical hazard information programs.
- Managed worldwide safety/health affairs with three internal professionals and an out-sourced loss control network.

1975 - 1986

Kaiser Aluminum & Chemical Corporation – Oakland, California

Director, Safety & Health (1982-1986)

Responsible for worldwide health and safety for 25,000 employees and 120 facilities. Established policy and developed programs/procedures to protect employees, customers and the public. Represented the company regarding safety, health, and public risk issues before government, union, and insurance organizations.

- Managed state/federal OSHA regulatory affairs involving over 600 facility inspections.
- Directed technical sales project involving loss control training for Saudi Arabian government.
- Researched and implemented protective clothing program for molten metal exposure resulting in 35% reduction in employee burn experience.

1975 - 1986

Kaiser Aluminum & Chemical Corporation – Oakland, California

Director, Safety & Protection Services (1975-1981)

Developed and managed company safety, fire protection, and security and workers' compensation programs for worldwide operations. Functionally supervised 50 safety/loss prevention professionals in ten operating divisions with an aggregate budget of \$9 million.

- Designed programs to reduce occupational injury/illness by 65% and property losses by 35%.
- Led effort to solve tubular strander accident problem involving machinery redesign which resulted in \$1.5 million annual savings.
- Instituted periodic briefing of Board of Directors Corporate Conduct Committee.
- Directed all workers' compensation claims management activities for self-insured, state fund, and T.P.A. programs.

1971 - 1974

AMAX, INC. – Greenwich, Connecticut

Corporate Director of Loss Prevention (1971-1974)

Managed safety, security, fire protection, occupational health and industrial hygiene programs for diversified natural resources company with 90 facilities and 17,000 employees worldwide. Directed company safety/health regulatory affairs and legislative activities.

- Established corporate loss prevention function and accredited industrial hygiene laboratory.
- Designed programs which reduced injury/illness rates and worker' compensation claims by 30%.
- Solved zinc refinery acid mist and lead smelter respiratory over-exposure problems.
- Served as principal member of Corporate Environmental Affairs Committee.
